

If New Village Academy is high school done differently, what should be different about our physical space?

 **plants**

Spaces for students to de-fuse

team offices with individual desk

mediation space

Noise reduction and Zen

large maker spaces for innovation projects

Areas for collaboration and connection (with other crews)

somewhere to lock personal belongings

yoga studio

Soft surfaces

Open space with flexible seating - not school furniture - more library like

Open space to let ideas and thoughts float down from the ether

Soft lighting

Anti-factory

Natural light in the corridors and common areas (skylights)

Maker Space

A space that each CREW can own

Places to MOVE

I loved the idea of garage door walls that can be opened or closed to change room sizes

Welcome and flexible space with quiet spaces

spaces to chill, communicate with other students, and daydream (work for young minds)

Rooftop playground with high fences

Standing Desks - flexible seating

space to promote natural conversations

Green space - bringing the outdoors in

not too cold, warm is great

Not too hot! Cold is okay

I hate being cold!

music lab

designated areas for walking around = to maybe take a break
